THE DOOR TO QUALITY.

Achieving a Higher Balance.

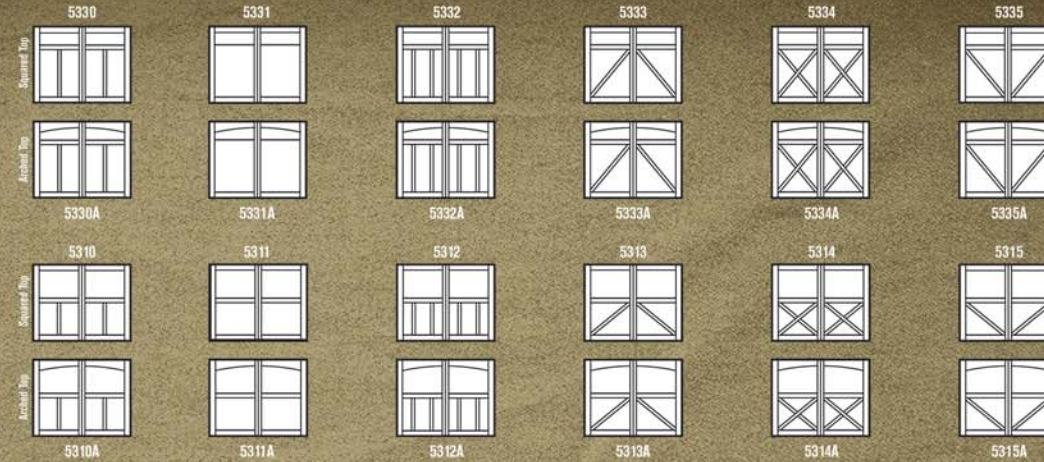

No door impacts the value of your home the way your garage door can - it needs to perfectly balance great performance with good looks.

At C.H.I., we've been creating garage doors that achieve that distinctive balance of form and function for decades.

Our skilled craftsmen are committed to making doors that provide a level of distinction that few can imagine. Built from the highest-quality materials available, to equally high specifications, your C.H.I. door will perform reliably for years. All the while, your door will reflect your home's personality while retaining its legendary performance for years to come.

Balancing form and function at a higher level - that's how you open the Door to Quality.

DESIGNS FOR STANDARD MODELS

Above designs vary depending on door widths and are available for the 5400 and 5500 models.

WINDOW & GLASS OPTIONS

Add a touch of elegance to the outside of your home with the addition of decorative window & glass options. These window & glass options are designed to enhance the natural beauty of the exterior while adding to the value of your home.

DESIGNER LITES

5300 SERIES

PRE-FINISHED DOORS

- Accent battens are laminated to the steel sections with high performance adhesives. The base sections and accent battens are then pre-finished in white, almond or sandstone before passing through an accelerated curing oven
- Squared top with no windows is standard
- Optional glass is available in clear glass, glue chip pattern or seeded glass
- 7/16" thick Poly pre-finished accent battens bonded to sections utilizing high performance adhesives and vacuum pressure
- White painted 20-gauge end stiles are standard
- Concealed steel plates run continuously from top to bottom of each section for fastening hardware
- Bottom weather seal utilizes an aluminum retainer and extruded virgin vinyl
- R-value - 6.29*

This Series was selected for its popularity and pleasing traditional architectural features which complement the look of numerous home styles. These doors replicate the classic look of wood with a virtually maintenance-free steel exterior and Poly accent battens. The light-weight yet durable steel exterior delivers years of deserved trouble-free service and protection.

PANEL CONSTRUCTION

Section joints utilize a ship lapped design for protection from the elements. Exterior is steel with accent battens and interior skin is always white. Polystyrene insulation is sandwiched between the exterior and interior steel skins.

**Calculated in accordance with ASHRAE standard formulas*

FEATURES

5400 SERIES

WOOD DOORS

- The base sections and cedar accent battens are manufactured unfinished as standard and are paintable or stainable
- Arched top and windows are optional
- 7/16" thick cedar accent battens bonded to sections utilizing high performance adhesives and vacuum pressure
- 2" thick sections
- Bottom weather seal utilizes an aluminum retainer and extruded virgin vinyl
- R-value - 6.29*

This door is available in twenty-four designs – each design offers great detail from the beadboard face to the accent battens that will accept stain in your choice of color. Add two choices of face hardware and twelve different window options and you have a door that will certainly enhance the curb appeal of your home.

PANEL CONSTRUCTION

These steel sandwich base sections have a Polystyrene core, followed by 5/16" smooth pine bead board and 7/16" cedar accent battens. The exterior comes standard as unfinished while the woodgrained steel back is always pre-finished in white.

5500 SERIES FIBERGLASS DOORS

The carriage house style has been a fundamental design for decades. This elegant look of classic wood is now available with a virtually maintenance-free fiberglass exterior. The door is protected with light-weight, yet durable and impact-resistant fiberglass, that can be factory finished in three designer colors. Interior panels are painted white. The numerous glazing and hardware options will continue to add character and value to your home for years of trouble-free service.

- The impact-resistant fiberglass skin and Poly accent battens are laminated to the steel sections with high performance adhesives. The base sections and accent battens are then pre-finished in white, almond or sandstone before passing through an accelerated curing oven
- Arched top and windows are optional
- Optional glass is available in plain, glue chip pattern or seeded glass
- 7/16" thick Poly pre-finished accent battens bonded to sections utilizing high performance adhesives and vacuum pressure
- White painted 20-gauge end stiles are standard
- Concealed steel plates run continuously from top to bottom of each section for fastening hardware
- Bottom weather seal utilizes an aluminum retainer and extruded virgin vinyl
- R-value - 6.29*

PANEL CONSTRUCTION

Section joints utilize a ship lapped design for protection from the elements. Interior woodgrain steel skins are always white. The exterior fiberglass skin is extremely impact-resistant and available in three designer colors.
